Business
Excellence

Francisco Ortiz-Monasterio

Franciso Ortiz-Monasterio is a principal joining Oliver Wight in 1991. He assists companies with Spanish-speaking personnel in Mexico and other Latin American countries in the evaluation, implementation, and operation of MRP II / ERP, Distribution Resource Planning (DRP), and Lean Manufacturing through consulting and education. He also supports these companies in their efforts to continuously improve their management and planning processes and has experience in systems integration and Total Quality Control.

"Francisco helped our company to reach "Class A" in MRP II in Mexico and Venezuela, obtaining Cost Reductions while Improving Quality and Customer Service in both sites. Also, our branches in Mexico, were awarded as "Class A" in DRP. His experience and professional commitment encourage us to continue on the way of success, now our goal is to attain the "Operational Excellence" level in the near future."

Francisco translated the Oliver Wight ERP - Successful Implementation, Sales & Operations Planning, and Demand Management classes into Spanish. He is an instructor and facilitator of these classes and also of the ERP-Achieving Class A Supply Chain Performance, Distribution Resource Planning, and Total Quality/Continuous Improvement classes.

Before joining Oliver Wight, Francisco worked in the production control area of the car and truck assembly plant at the Ford Motor Company in Mexico City. Afterwards, he worked for more than 20 years at the Eastman Kodak Company in their photographic film manufacturing facility located in Guadalajara, Jalisco, Mexico (Industria Fotografica Interamericana). He held

positions in distribution and traffic, information systems, and was project manager for the MRP II system implementation. Three MRP II projects at the site achieved Class A certification.

Francisco was a member of the American Production and Inventory Control Society (APICS) and one of the founder members of the Supply Chain Council chapter for Latin America.

He holds an electromechanical engineering degree from Iberoamericana University with a major in industrial engineering and has taught in these areas at ITESO University and at the Panamericana University to the graduates in Industrial Engineering.
