

Is it challenging for your organization to create accurate demand plans?

Here's what the registrants of our upcoming webinar *"How to Leverage Multiple Forecasts & Views to Create an Accurate Demand Plan"* told us in a recent survey:

How satisfied are you with your ability to gather information from multiple sources when creating a monthly plan?

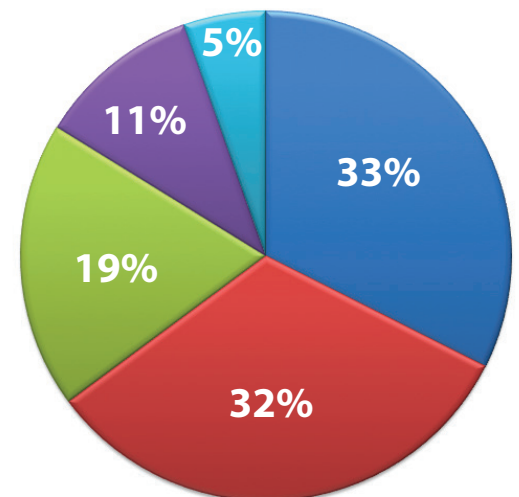

How satisfied are you with communicating the output of monthly plans to others in the organization?

What software do you use to create demand forecasts?

-  Excel
-  Forecast Pro
-  Other dedicated software
-  ERP Module
-  Don't use software

How satisfied is your organization? We invite you to **attend the Webinar** to learn how you can leverage multiple views to create accurate Demand Plans.
